

SAMIR GENAI ACADEMY

PROFESSIONAL STUDY GUIDE SERIES

25 Modules · 5 Phases · Professional Track

Master Generative AI & Agentic AI

The complete 25-module study-guide series. Each module ships a downloadable PDF guide and a companion video — read, copy the code, build, and master Generative & Agentic AI.

Instructor: **Samir Kumar** · Edition 2026

SERIES INDEX

01 The Five Phases

- ▶ **Phase 01** — GenAI Foundations
- ▶ **Phase 02** — RAG & Knowledge Systems
- ▶ **Phase 03** — Agentic AI Engineering
- ▶ **Phase 04** — Advanced Agentic Patterns
- ▶ **Phase 05** — Capstone & Deployment
- ▶ **Bonus** — Claude Code Masterclass

02 All 25 Modules

01	AI, Machine Learning and Generative AI How each one grew out of the last — and where the LLM sits	Phase 01
02	How LLMs Work Transformers, attention, tokenization & emergent intelligence	Phase 01
03	Prompt Engineering Mastery Zero-shot, few-shot, CoT, ToT & structured output techniques	Phase 01
04	Multimodal AI Systems Vision, audio, video & code — unified model architectures	Phase 01
05	Fine-Tuning & PEFT LoRA, QLoRA, instruction tuning — customise any model	Phase 01
06	Vector Databases & Embeddings Pinecone, Weaviate, pgvector — semantic search fundamentals	Phase 02
07	RAG Architecture Naive RAG -> Advanced RAG -> Modular RAG pipelines	Phase 02
08	Advanced RAG Techniques Self-RAG, Corrective RAG (CRAG), GraphRAG & hybrid search	Phase 02
09	LangChain & LlamaIndex Build production RAG apps with top orchestration libraries	Phase 02
10	Production RAG Systems Evaluation, monitoring & optimising RAG at scale	Phase 02
11	Agentic AI Fundamentals ReAct loop, tool calling, memory types & cognitive architectures	Phase 03
12	OpenAI Agents SDK Build production agents with Swarm, handoffs & guardrails	Phase 03

13	LangGraph Deep Dive Stateful graph-based agents with checkpointing & HITL	Phase 03
14	CrewAI Multi-Agent Systems Role-playing agent teams, crews, flows & task orchestration	Phase 03
15	Model Context Protocol (MCP) Resources, Tools, Prompts & Sampling — the new agent standard	Phase 03
16	Multi-Agent Orchestration Hierarchical, peer-to-peer & event-driven agent networks	Phase 04
17	Agent Memory & Persistence Long-term persistent and structured episodic memory stores	Phase 04
18	Code & Browser Agents Build agents that write, run code & control browsers	Phase 04
19	Agent Evaluation & Safety Benchmarking, red-teaming & responsible agentic AI	Phase 04
20	LLMOps & Agent Monitoring Observability, tracing, cost control & production reliability	Phase 04
21	Building AI Copilots Domain-specific assistants for coding, research & business	Phase 05
22	Autonomous Workflow Agents n8n, Zapier AI & no-code agentic automation pipelines	Phase 05
23	AI Product Architecture Design AI-native SaaS — APIs, streaming, caching & costs	Phase 05
24	Cloud Deployment & Scaling AWS Bedrock, GCP Vertex, Azure AI — production deployment	Phase 05
25	Future of Agentic AI Physical AI, agent economies, AGI timeline & roadmap	Phase 05
26	Claude Code Masterclass The complete guide — Claude, Claude Code, Cowork, connectors, plugins, skills & agentic workflows	Bonus
